

FAN SERIES

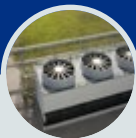

EDGE5

The new EDGE 5 blade profile is ideal for operating points and airflow resistance typically found in HVAC/R applications. The lightweight structure allows for a longer blade design resulting in the largest diameter range with a minimum number of blades in its respective class.

Hub Size Max Ø [mm]	3	4	5	6	7	8	9	12	16
	1162	1162	1127	1162	1168	1248	1182	1262	1357

Cooling Towers

Heat Exchangers

Designed for HVAC/R applications.

Lightweight and highly efficient.

The EDGE 5 blade profile has been specifically developed for HVAC/R applications. The broad profile body and unique shape provides high airflow volumes at low rpm.
