FAN SERIES

HEOS6

**NEW GOLD
STANDARD FOR
EFFICIENCY**

This new blade profile is specially designed for climate-controlled barn-applications with diffusers. It delivers high airflow with the best efficiency on the market at low rpm. The lightweight design and optimized operating points result in a significant reduction in noise emissions. All while the well-being of the animals and farm workers is improved leading to an increase in yield.

**New benchmark
on the market for
volumetric efficiency**

**Optimized for
diffuser-applications
and super quiet fan.**

The backward-sickled HEOS6 blade improves diffuser performance downstream and allows a longer blade design. This results in the largest diameter range with a minimum number of blades.
